Visible Learning[plus] for Mathematics, K–12

3 Semester Hours of
Graduate Credit

About Corwin Advance

Corwin Advance courses are created from popular Corwin books in direct consultation with our author experts. Each course features learning and skills you can transfer to your classroom immediately, using video from classrooms showing strategies in action, along with interviews with authors, teachers, and students. All Corwin Advance courses are designed to support teacher license renewal and professional growth with the goal of improving outcomes for all students.

Accessing the Course

To access your course you will need an Internet-connected device such as a computer, tablet, or mobile phone. Courses run within the following web browsers:

- Chrome
- Firefox (Extended Releases are not supported)
- Internet Explorer 11 (Windows only)
- Edge (Windows only)
- Safari 10 and 11 (Macintosh only)

For the best experience please ensure that your browser is up to date.

Login

1. Go to https://corwin.instructure.com
2. Login with the email address and password you used to purchase the course.
3. If you don't remember the password you created, simply click Forgot Password? to reset it.

Materials

All required readings and videos are included in the course as digital files, including content from:

Hattie, J., Fisher, D., & Frey, N. (2017). *Visible learning for mathematics, grades K–12: What works best to optimize student learning.* Thousand Oaks, CA: Corwin.

Course Description

The purpose of this course is to connect the Visible Learning research to instructional strategies that accelerate student learning in mathematics education. You will examine dynamic and high-probability teaching strategies that support surface, deep, and transfer phases of learning and see these strategies in action with video from real classrooms. This course is designed for teachers focused on mathematics instruction across all grades K–12. Upon completion of this course, you will be prepared to analyze the impact of your own teaching practices on student progress and achievement and be able to apply your knowledge to guide students to become drivers of their own learning, regardless of the content area.

Course Objectives

By the end of this course, you will be able to:

- articulate the key findings from Professor John Hattie's visible learning research;
- communicate the importance of well-timed, effective strategies and instructional routines for mathematics education;
- examine the concepts of formative assessment, feedback, differentiation, and learning intentions with success criteria in mathematics;
- apply the three-phase learning process (surface learning, deep learning, and transfer learning) to mathematics curriculum planning and instructional practices.

Course Outline

This course is self-paced. However, if you are taking this course for graduate credit, please be aware of the due date of the final assignment as this must be met in order to receive credit.

Key Dates

Many students find the courses most rewarding if they work through at a steady pace, setting aside dedicated time to take the course. Completing one module per week is a common goal.

Module 1	What Is Visible Learning^{plus}?	3.5 hrs
	After completing this module, you will be able to: • articulate the key findings from Professor John Hattie's visible learning research, and • define what 0.40 effect size reflects and what effect size means.	Typical time to complete
Read A	Why Visible Learning?	
Read B	Influences on Student Achievement	
Watch A	Know Thy Impact	
Watch B	Focus on Learning	
Watch C	The Visible Learning School: Shared Language of Learning	
Reflect and Create	Setting S.M.A.R.T.E.R. Goals for Your Visible Learning^{plus}	
Discuss	Learning From Visible Learning Research	
Dialogue	Sharing Visible Learning	
Quiz	What About Visible Learning?	Graded
Reflect	Putting Research Into Practice	
Update Your Portfolio	Visible Learning^{plus} in Practice	

Module 2 — What Is Visible Learning^plus for Mathematics?

After completing this module, you will be able to:
- envision your mathematics classroom as a Visible Learning classroom.
- compare the SOLO Model with the three phases of the learning process in mathematics and explain the importance of each phase for mastery learning.
- explain how to use effect size and the three phases of the learning process to inform your choice of the right instructional strategy at the right time.

3.5 hrs Typical time to complete

Focus	Intentional Sequence of Learning	
Read	Making Learning Visible in Mathematics	
Watch A	What Is Visible Learning for Mathematics?	
Watch B	What Is Visible Learning for Mathematics?	
Check Your Knowledge	Visible Learning Research	Submit for Feedback
Analyze and Reflect	The Three Phases of Learning	
Discuss	Learning From Visible Learning Research	
Explore	The SOLO model	
Quiz	The Learning Process	Graded
Reflect	Informed Decisions	
Update Your Portfolio	The Right Strategy and the Right Time	

Module 3 — Teacher Clarity: Learning Intentions and Success Criteria

After completing this module, you will be able to:
- create three types of learning intentions for teacher clarity.
- develop success criteria aligned with learning intentions for teacher clarity.
- explain how to use learning intentions and success criteria to inform your choice of the right instructional strategy at the right time.

3.5 hrs Typical time to complete

Focus	Content, Language, and Social Learning Intentions	
Read A	Making Learning Visible Starts With Teacher Clarity	
Watch A	Learning Intentions in the Classroom	
Watch B	Achieving Teacher Clarity With Success Criteria	
Watch C	What Does Teacher Clarity Mean?	
Check Your Knowledge	Clear Learning Intentions	Submit for Feedback
Evaluate and Create	Teacher Clarity in a Math Lesson Plan	
Discuss	I Used to Think. . . . Now I Think . . .	
Dialogue	Envisioning Variations of Learning Intentions and Success Criteria	
Quiz	Examples and Non-Examples	Graded
Read B	Student Self-Reflection	
Project	Student Self-Reflection	Submit for Grading
Reflect	My Self-Reflection	
Update Your Portfolio	A Reflection Plan	

Module 4	Effective Mathematical Tasks and Talk	
	After completing this module, you will be able to: • explain and evaluate the characteristics of mathematical tasks that make learning visible. • explain and evaluate the characteristics of mathematical talk that make learning visible.	**3.5 hrs** Typical time to complete
Focus	Anticipation Guide	
Read	Mathematical Tasks and Talk That Guide Learning	
Watch A	What We Mean by Tasks With Rigor	
Watch B	Questioning That Guides Learning	
Watch C	Student Discourse That Builds Understanding	
Examine	Adjusting the Rigor	
Observe and Analyze	Analyzing Tasks and Talk	
Discuss	Implementing Rich Tasks and Talk	
Dialogue	Quality Resources for Teacher Questioning	
Quiz	Which Level? Which Type?	Graded
Reflect	The Right Task at the Right Time	
Update Your Portfolio	Tasks and Talk That Guide Learning	

Module 5	Surface Learning for Mathematics	
	After completing this module, you will be able to: • describe what surface learning looks like and sounds like in the mathematics classroom. • demonstrate the connection between teacher clarity and surface mathematical learning. • analyze examples of effective, evidence-based instructional strategies for surface learning of mathematics content.	**3.5 hrs** Typical time to complete
Focus	Surface Learning	
Read	Surface Mathematics Learning Made Visible	
Watch A	Surface Mathematics Learning	
Watch B	Effective Surface Learning Instructional Strategies	
Watch C	Surface Learning in Action	
Examine	Strategic Use of Manipulatives	
Analyze and Create	Reviewing the Research on Surface Learning Instructional Strategies	
Discuss	Surface or Superficial Learning	
Dialogue	Surface Learning in a Unit	
Quiz	Being Strategic in Surface Level Learning	Graded
Reflect	Surface to Deep Learning	
Update Your Portfolio	Surface Learning Instructional Strategies	

Deep Learning for Mathematics

Module 6	**Deep Learning for Mathematics** After completing this module, you will be able to: • describe what deep learning looks like and sounds like in the mathematics classroom. • demonstrate the connection between teacher clarity and deep mathematical learning. • analyze examples of effective, evidence-based instructional strategies for deep learning of mathematics content.	**3.5 hrs** Typical time to complete
Focus	The Second Phase of the Learning Process	
Read	Deep Mathematics Learning Made Visible	
Watch A	Deep Mathematics Learning	
Watch B	Effective Deep Learning Instructional Strategies	
Watch C	Deep Learning in Action	
Create and Reflect	Practicing a Deep Learning Instructional Strategy	
Discuss	Discourse in Deep Learning for English Language Learners	
Dialogue	Deep Learning in a Unit	
Quiz	Deep Learning Examples and Non-Examples	Graded
Reflect	Mathematical Practices in Deep Learning	
Update Your Portfolio	Practicing Deep Learning Strategies	

Module 7	**Transfer Learning for Mathematics** After completing this module, you will be able to: • describe what transfer learning looks like and sounds like in the mathematics classroom. • demonstrate the connection between teacher clarity and transfer mathematical learning. • analyze examples of effective, evidence-based instructional strategies for transfer learning of mathematics content.	**3.5 hrs** Typical time to complete
Focus	The Third Phase of the Learning Process	
Read	Transfer Mathematics Learning Made Visible	
Watch A	Transfer Mathematics Learning	
Watch B	Transfer Learning to Real World Situations	
Watch C	Transfer Learning in Action	
Evaluate and Create	Evaluating Transfer Tasks	
Discuss	The Right Transfer Task at the Right Time	
Dialogue	Transfer Learning in a Unit	
Quiz	The Right Match	Graded
Reflect	Assessment-Capable Visible Learners and Transfer Learning	
Update Your Portfolio	Transfer Tasks	

Module 8 — Determining Impact: Assessment and Feedback

After completing this module, you will be able to:
- compare formative and summative evaluation
- explain the connection between formative evaluation and feedback
- summarize the four levels of feedback and when each is most effective for the learner
- examine the qualities of effective feedback based on timing, amount, mode, and audience.

3.5 hrs Typical time to complete

Focus	The First Phase of the Learning Process	
Read	Assessment, Feedback, and Meeting the Needs of All Learners	
Watch A	Formative Evaluation	
Watch B	Summative Evaluation	
Watch C	Feedback	
Watch D	Feedback in Action	
Examine	The Formative 5	
Observe and Analyze	Analyzing Feedback	
Discuss	Surface or Superficial Learning	
Dialogue	Feedback Analysis	
Quiz	Selecting Assessments and Providing Feedback	Graded
Project	Linking Formative Assessment and Feedback	Submit for Grading
Reflect	The Assessment-Feedback Cycle	
Update Your Portfolio	Formative Assessment and Feedback	

Module 9 — When Students Struggle: Differentiation and RTI

After completing this module, you will be able to:
- analyze the relationships among formative evaluation, feedback, differentiation, and intervention.
- create a differentiated math lesson by adjusting the content, process, or product based on students' zones of proximal development.
- contrast differentiation and intervention.
- apply the eight recommendations for effective Response to Intervention to evaluate current intervention practices and/or to make intervention plans.

3.5 hrs Typical time to complete

Focus	Two Responses When Students Struggle	
Read	Meeting the Needs of All Learners	
Watch A	Differentiating Instruction to Support Surface, Deep, and Transfer Learning	
Watch B	Differentiating Procedural Learning	
Watch C	Assessing Student Progress and Planning Next Steps	
Examine	The Six-Step Planning Model for Differentiated Instruction	
Create	Six-Step Planning Model for Differentiated Instruction	
Discuss	Progress Monitoring My Differentiation and Intervention	
Dialogue	Eight Recommendations for RTI	
Quiz	Effective or Ineffective RTI	Graded
Project	Effective Intervention Self-Evaluation	Submit for Grading
Reflect	Differentiation and RTI	
Update Your Portfolio	Planning Effective Interventions	

Module 10 — What Works and What Doesn't

Module 10	### What Works and What Doesn't After completing this module, you will be able to: • Identify five instructional strategies that are not effective and justify why they are ineffective. • defend evidence-based instructional strategies that can be alternate practices for the five ineffective instructional strategies.	**3.5 hrs** Typical time to complete
Focus	Learning From What Doesn't Work	
Read	Learning From What Doesn't Work	
Watch A	Creating Assessment-Capable Visible Learners	
Watch B	Growth Mindset: A Student's Perspective	
Examine	Assessment-Capable Visible Learners	
Check Your Knowledge	What Doesn't Work	Submit for Feedback
Reflect and Create	Changing Practice	
Discuss	Research and Experience	
Explore	My Unanswered Questions	
Quiz	Ineffective and Effective Strategies	Graded
Reflect	Start, Stop, Don't Stop, Don't Start	
Update Your Portfolio	Making the Greatest Impact	

Module 11 — Mindframes for Visible Learning

Module 11	### Mindframes for Visible Learning After completing this module, you will be able to: • articulate the key attributes of the 10 mindframes for visible learning. • plan how to implement mindframes in your own professional practice.	**3.5 hrs** Typical time to complete
Focus	What Is Your Mindset?	
Read	10 Mindframes	
Watch A	Mindframes Are a Frame of Mind	
Watch B	Lesson Planning With Mindframes in Mind	
Watch C	Embedding the Mindframes	
Examine	Giving Feedback and Using Feedback	
Evaluate and Create	Mindframes in Action	
Discuss	Mindframes in Practice	
Dialogue	I Am a Change Agent	
Quiz	When Mindframes Are Visible	Graded
Reflect	Making Mindframes Visible	
Update Your Portfolio	Mindframes and Teaching for Success	

Capstone

Final Project	Visible Learning for Mathematics Plan	Submit for Grading
Final Exam	Visible Learning[plus] for Mathematics	Graded
Final Reflect	Consider Thy Impact	
Update Your Portfolio	Visible Learning for Mathematics Plan	

InTASC Standards Alignment

Our courses have been aligned to the InTASC Mode Core Teaching Standards that outline what all teachers across all content and grade levels should know and be able to do to be effective in today's learning contexts. You can also view alignment to other popular frameworks here.

Standard	Covered in Modules
Standard 1: Learner Development	1, 2, 4–8, 11
Standard 2: Learning Differences	9
Standard 3: Learning Environments	3
Standard 4: Content Knowledge	5, 6, 7
Standard 5: Application of Content	4
Standard 6: Assessment	8, 9
Standard 7: Planning for Instruction	1, 2, 3, 4, 9, 10, 11
Standard 8: Instructional Strategies	5, 6, 7
Standard 9: Professional Learning and Ethical Practice	1, 2, 10, 11
Standard 10: Leadership and Collaboration	8

Course Policies

Grading Policy and Rubric

Letter Grade	% Grade
A	94–100
A-	90–93
B+	87–89
B	84–86
B-	80–83
C+	77–79
C	74–76
C-	70–73
D*	65–69
F*	0–64

Component	Percentage of Final Grade
Final Project	40%
Final Exam	20%
Module Projects	30%
Module Quizzes	10%

Students earning a D grade or below will not be eligible to receive a Certificate of Completion or graduate credit.

Assignment Resubmission Policy

Students receiving a non-passing grade in the course have one opportunity to re-submit a project assignment to improve their grade. To resubmit an assignment please work directly with your course facilitator; you have seven days from completion of the course to resubmit the assignment.

Facilitation Model

Throughout your course experience, you will have a dedicated facilitator to answer questions and provide feedback on your submitted projects. Your facilitator will respond to any questions within one business day. All submitted assignments will receive written feedback and grades within 5 business days of their submission date.

Standards of Academic Integrity

Corwin Advance maintains high standards of academic integrity related to student academic performance in our courses. When enrolling in a Corwin Advance course you do so with the understanding and agreement to produce your own work, to submit assignments that you completed yourself, and to take quizzes and exams without the assistance of others. Course facilitators will enforce our Standards of Academic Integrity Policy and will report to Corwin all suspected violations. Read the full Standards of Academic Integrity Policy at the Corwin Advance Academic Integrity web page.

University Graduate Credit & Transcript

If you select a course that is eligible for graduate credit, that credit will be awarded upon successful completion of the course by the university you select upon purchase. Upon successful completion Corwin will communicate your final grade to the university and you will be directed to the university to register and access your transcript. This could take 2–3 weeks depending on the university, though you will receive a Corwin Certificate of Completion upon completion of the course. For more details on Corwin Advance university partners visit our web page, or if you have questions, contact advancesupport@corwin.com.
